

WHAT IS AN APPRENTICESHIP?

An apprenticeship is a government regulated program in which 85% of the learning takes place on the job and 15% takes place at an approved community college.

The length of this training varies depending on the trade.

In order to be sent to a community college, students must be signed to an apprenticeship agreement with a certified tradesperson and the Ministry Training Colleges and Universities. The apprenticeship program is supported by the provincial government and Human Resources Development Canada (HRDC).

Many professionals including doctors, lawyers, engineers and nurses do similar on-the-job learning as part of their training and certification.

Pre-apprenticeship programs are available at some community colleges; However, tuition is charged.

Ministry Machinist Apprenticeship is 8000hrs.

Ministry Tool & Die Apprenticeship is 10000hrs.

Ministry Millwright Apprenticeship is 8000hrs.

A Advantages

- Begin apprenticeship training while completing your secondary school diploma
- Reduce apprenticeship time by 1½ years
- Get your foot in the door with a potential employer
- Save Common Core level college tuition
- Earn while you learn
- Opportunity for qualifications in CPR and First Aid
- Receive more hours of instruction than in college program
- Be registered as an apprentice with an employer and the government while still attending high school

B Application Process

Pre Registration:

Discuss career plans with parents, teachers and/or student services department staff.

Formal Application:

Choose OYAP Manufacturing on the WOSS option sheet or fill in an OYAP application found in student services before the end of February.

Information Interview:

Participate in a formal interview designed to gather information about the student and to clarify information regarding OYAP. A resume is required.

C Upon acceptance to the program students will:

- Earn high school credits while working on the job as a paid apprentice
- Maintain a strict attendance policy
- Make a commitment to work hard consistently and regularly in all courses while in school and on the job
- Continue apprenticeship after high school
- Have the opportunity to write a basic college apprenticeship exemption exam after successful completion of the OYAP program with a 70%
